Yu-Heng Lin (林宇恆) TEL: +1-236-777-7746 EMAIL: yh.lin@zoology.ubc.ca

Personal website: https://yhlin1996.wixsite.com/yuhenglin

CURRENT POSITION

2021-present Ph.D. candidate, Department of Zoology, University of British Columbia
Advisor: Dr. Leticia Avilés

EDUCATION

National Taiwan University (NTU), Taiwan

2018-2020 **M.Sc.**, Institute of Ecology and Evolutionary Biology (overall GPA 4.02/4.3)
Advisor: Dr. Sheng-Feng Shen

2014-2018 **B.Sc.**, Department of Life Science (overall GPA 3.35/4.3)

PUBLICATION & PRESENTATION

Journal Paper

2023 **Y.H. Lin**, Y.Y. Chen, D. R. Rubenstein, M. Liu, and S.F. Shen*. Environmental quality mediates the ecological dominance of cooperatively breeding birds. *Ecology Letters*, https://doi.org/10.1111/ele.14226.

2020 B.F. Chen, M. Liu, D.R. Rubenstein, S.J. Sun, J.N. Liu, **Y.H. Lin**, S.F. Shen*. A Chemically-triggered Transition from Conflict to Cooperation in Burying Beetles. *Ecology Letters*, doi: 10.1111/ele.13445

2019 **Y.H. Lin**, S.F. Chan, D.R. Rubenstein, M. Liu, M. Liu, and S.F. Shen*. Resolving the Paradox of Environmental Quality and Sociality: The Ecological Causes and Consequences of Cooperative Breeding in Two Lineages of Birds. *The American Naturalist, Vol. 194, pp. 207–216.* doi: 10.1086/704090

Conference Presentation(§Talk †Poster)

2024 Oct §The 8th Asian Society of Arachnology Conference, Wuhan, China
Title: "The evolution of cooperative spider societies at the intersection between costly webs and environmental harshness"

2024 May †Canadian Society for Ecology and Evolution, University of British Columbia, Canada
Title: "The evolution of cooperative spider societies at the intersection between costly webs and environmental harshness"

2023 Jul †Animal Behavior Society annual meeting, Portland, USA
Title: "Web-building spider strategies to cope with damage from the rain along a gradient of precipitation intensity"

Jan 2019 §Congress of Animal Behavior and Ecology, National Taiwan University, Taiwan
Title: "Resolving the paradox of environmental quality and sociality: the ecological causes and consequences of cooperative breeding in birds"

Aug 2017 †BRCAS Summer Internship Program, Academia Sinica, Taiwan
Title: "Resolving the paradox of environmental quality and sociality: the ecological consequences of cooperative breeding in starlings and hornbills"

Aug 2016 †BRCAS Summer Internship Program, Academia Sinica, Taiwan

Title: "Ecological consequence of cooperative breeding in hornbills and starlings"

AWARDS & FELLOWSHIP

2024-2025	Government Scholarship to Study Abroad /GSSA, Taiwan, US$16000 per year
2024	The Third Prize of Student Talk, The 8th Asian Society of Arachnology Conference, Wuhan, China
2022	American Arachnological Society Student Research Grant, US$600
2022	Dennis H. Chitty Memorial Graduate Scholarship in Ecology, CA$1000
2021-2024	Department of Zoology Four year fellowship, University of British Columbia, CA$18200 per year
2019	Outstanding Achieve Award in Oral Presentation Competition, Congress of Animal Behavior and Ecology, Taipei, Taiwan

RESEARCH EXPERIENCE

2025 summer	**"Strengthening Biodiversity Monitoring through Community Science and Spatial Integration in the City of Surrey"** Conducted fieldwork to collect flora and fauna observations across several parks in Surrey; curated and validated species occurrence data on iNaturalist; integrated the refined data into the City's mapping system to develop Biodiversity Indicator Index.
2021-present	**"Web-building spider strategies to cope with damage from the rain along a gradient of precipitation intensity"** **Supervisor: Dr. Leticia Avilés, University of British Columbia** Designed and conducted field research on how web-building spiders deal with rainfall damage in Ecuador, analyzed data with generalized linear mixed model (GLMM)
2021-present	**"The evolution of cooperative spider societies at the intersection between costly webs and environmental harshness"** **Supervisor: Dr. Leticia Avilés, University of British Columbia** Designed and collected published data on how cooperative behavior evolved in social spider clades, analyzed data with phylogenetic regression model
2021-present	**"The evolution of sociality at the intersection between life history and ecology: a comparative analysis"** **Supervisor: Dr. Leticia Avilés, University of British Columbia** Designed and collected published data on how cooperative behavior evolved in different social clades (avian, canids, arachnids, etc.), analyzed data with phylogenetic regression model
2018-2021	**"The Social Conquest of Birds: The Ecological Consequences of Sociality in Cooperatively Breeding Bird"** **Ecology and Sociobiology Lab, Biodiversity Research Center: Academia Sinica** Collected climate factors and range size database in all avian clades, analyzed phylogenetic regression in global scale

2017-2019 **"The influence of biotic and abiotic factors on the elevational distribution in burying beetles"**
Ecology and Sociobiology Lab, Biodiversity Research Center: Academia Sinica
Designed and conducted field research on the cooperative behavior in burying beetles, conducted manipulation of carcasses quality, density survey by hanging pitfall trap, and high-resolution video record in China, Taiwan, and Japan

2016-2018 **"Resolving the Paradox of Environmental Quality and Sociality: The Ecological Causes and Consequences of Cooperative Breeding in Two Lineages of Birds."**
Ecology and Sociobiology Lab, Biodiversity Research Center: Academia Sinica
Collected climate factors and range size database, analyzed phylogenetic regression in two lineages of birds

2015-2016 **"A Chemically-triggered Transition from Conflict to Cooperation in Burying Beetles"**
Ecology and Sociobiology Lab, Biodiversity Research Center: Academia Sinica
Conducted GC-MS instrument, analyzed the chemical composition of rotten rat carcasses in the air

TEACHING EXPERIENCE

2025 BIOL 180 Thinking Like a Life Scientist, Teaching assistant, UBC
Instructor: Dr. Jennifer Klenz

2025 BIOL 416 Principles of Conservation Biology
Instructor: Dr. Jonathan Davies

2024 BIOL 180 Thinking Like a Life Scientist, Teaching assistant, UBC
Instructor: Dr. Thomas Whelan

2023 BIOL 180 Thinking Like a Life Scientist, Teaching assistant, UBC
Instructor: Dr. Donald Wong

2022 BIOL 180 Thinking Like a Life Scientist, Teaching assistant, UBC
Instructor: Dr. Andrew Trites

2022 BIOL 140 Laboratory Investigations in Life Science, Teaching assistant, UBC
Instructor: Dr. Jennifer Klenz

2019 Zoology Lab Course, Teaching assistant, NTU
